# INSTALLATION INSTRUCTIONS FOR CMP CABLE GLAND TYPES BW

## CABLE GLAND COMPONENTS - It is not necessary to dismantle the cable gland any further than illustrated below

- 1. Entry Component (CIEL Entry on BWL CIEL)
- 2. Detachable Armour Cone
- 3. AnyWay Clamping Ring
- 4. Body
- 5. Earth Bolt

## PLEASE READ ALL INSTRUCTIONS CAREFULLY BEFORE BEGINNING THE INSTALLATION

- 1. Separate components (1), (2), and (3). If required, fit a shroud over the cable outer sheath. Prepare the cable by removing the cable outer sheath and the braid/armour to suit the geometry of the equipment. Remove a further 18mm (max) of outer sheath to expose the armour. If applicable remove any tapes or wrappings to expose the inner sheath.

**NOTE: On maximum size cables the clamping ring may only pass over the armour.**

- 2. Secure the Entry Component (1) into the equipment as indicated.

- 3. Pass the cable through the entry item and evenly space the braid/armour around the cone.

- 4. While continuing to push the cable forward to maintain contact between the armour and the Cone (2), tighten the Body (4) by hand until the AnyWay Clamping Ring (3) is felt to have engaged the armour. Hold the Entry Component (1) with a spanner and tighten the Body (4) using a spanner until all available threads are used.

- 5. Ensure the Entry Item (1) and Body (4) are fully tightened together

- 6. On the BWL CIEL fasten earth cable to the Earth Bolt (5) and tighten.
