

# MMtrough

## Product Guide

### Cable Trough System

#### Strong, secure and lightweight cable trough

- **Quick Assembly** - 1 metre long sections are connected together using jointing pegs which allows 1-3° of movement possible to follow gentle curves in the track.
- **Lightweight** - Weighing under 10kg MMtrough offers significant health and safety advantages over traditional concrete troughing systems that can weigh over 90kg.
- **Flexible** - MMtrough is built with 3° of flexibility in the interlocking connection to match bends in the track. For more extreme bends, vertical and horizontal bends can be supplied.
- **Strong** - MMtrough is designed with reinforced ribbing and twin-wall design which ensures it meets pedestrian loadings.
- **Single Person Install** - MMtrough is suitable for single person lift and install, enabling compliance with manual handling regulations. Being lightweight and easy to deploy results in considerable project time and cost savings.
- **Tamper Proof** - MMtrough units can be secured against the threat of vandalism or theft with standard tamper proof locks and keys.
- **Linear Ballast Anchor Points** - Secure the MMtrough unit into the surrounding material, meaning units are not displaced by the velocity of passing trains or vehicles.

#### Product Details

Weight: 9.5kg  
Length: 1000mm  
Material: Glass Reinforced Polyester Resin

#### Section Profile
