

## MOS - Multi Tool Series EH

### Type EHS130 I with knife on the side

**MOS -  
the original!**

With these MOS Multi Tool of the series EH, high voltage cables are prepared with high precision for mounting joints and terminations. Outer diameter D 35 - 130 mm. Cutting depth 0.1 - 50 mm.

#### MOS Recessing Tool EHS130

- Cutting knife placed on the (left) side of the guide rolls
- Allows cable preparation directly at the cable end
- Automatic feed rate
- Very simple operation

#### Scope of Application

- Precise cutting of circumferential notches into the insulation (5, 10, 20, 30, 40, 50, 60 mm wide)
- Precise tapering of the insulation with 20°, 30°, 45° pitch
- Cut and remove insulation, max. cutting depth 50 mm

Big selection of knives for different shapes

Technical Specification	EHS130
Cable-Ø:	35 - 130 mm
Knife:	Notch-Knife 10 mm, Cone-Knife 45°
Weight:	6.5 kg
Options:	Various knives according to your need (actual >20 different knife shapes)
